ABOUT ME

Front-end enthusiasts developer looking for my first opportunity in the programming word.

My organized and committed character guides me to handle over projects successfully, applying good practices and with a well-structured code.

Although at the beginning I oriented my professional career to the Economic Sciences word, my curiosity, my inquietude and my creative and adventurous spirit led me to train as Front-end Developer Adalab Digital School. With them I have discovered my passion for programming and layout.

PROYECTOS
